PAVER

Product Range:	Pavestone 80mm
Product Name:	Ebony Spectra Quartz
	

This technical information represents average properties obtained from production lots, and should not be used for specific purposes. If specific results are required, samples should be taken from current production lots. Australian/New Zealand standards 4456 and 4586 are used as applicable. Durability classification based on product knowledge under local (Perth) climatic condition. Colours may look and/or print differently than the actual colour depending on your computer monitor and/or printer settings and capabilities. Information subject to change without notice.

Typical Properties	
Length (mm)	230
Width (mm)	114
Height (mm)	80
Dimensional Category	DPA1
CMAA Shape Category	Type C
Average Unit Weight (kg)	4.5
Average Units Per Square Metre	37
No. Per Pack	210
Average Bulk Density (kg/m ³)	<2400
Characteristic Breaking Load (kN)	>12
Cold Water Absorption (%)	<5
Mean Abrasion Index (V _a)	<8
Slip Resistance Category	P5
Potential to Effloresce	Slight
Durability Class	General Purpose
